

Security Policy

1. Introduction

This document defines the security policies and procedures applied within the company.

The objective of this security policy is to protect company information systems, user accounts, and confidential data against unauthorized access.

2. User Account Management

Every employee receives a personal account to access company resources.

Users must:

- Keep their passwords confidential.
- Use strong passwords.
- Avoid sharing credentials with other employees.
- Report suspicious activities to the IT security team.

3. Password Policy

Company passwords must respect the following rules:

- Minimum length: 12 characters.
- At least one uppercase letter.
- At least one lowercase letter.
- At least one number.
- At least one special character.

Passwords must be changed every 90 days.

Users must not reuse previous passwords.

4. Password Recovery Procedure

If a user forgets their password, they must follow the password recovery procedure.

Steps:

1. Access the internal company portal.
2. Select the option "Forgot Password".
3. Enter the company email address.
4. Verify the identity using the registered authentication method.
5. Create a new secure password.

If the user cannot recover the password automatically, they must contact the IT support team.

The IT support team will verify the user's identity before resetting the account password.

5. Access Control

Access to company resources is based on user roles.

Employees can only access information required for their professional activities.

Administrators have additional permissions to manage systems and security configurations.

6. Security Incident Reporting

Employees must immediately report:

- Unauthorized access attempts.

- Suspicious emails.
- Malware infections.
- Data leaks.

Security incidents must be reported to:

IT Security Team

Email:

security@company.com

7. Data Protection

Company data must be stored securely.

Sensitive documents must:

- Be encrypted.
- Have restricted access.
- Be backed up regularly.

Employees must not copy confidential information to personal devices.

8. Backup Policy

Critical company data is backed up daily.

Backups are stored in secure locations and tested regularly to ensure data recovery.
